Other Products

Hercules Offshore Lifting Gear Pty Ltd have developed a range of other innovative products for the offshore petroleum industry including:

- Exoskeletal container frames built to specification.
- Offshore baskets of various sizes and capacities
- Gas bottle transport cages
- Custom designed and manufactured equipment
- General purpose offshore lifting frames for small machinery such as welding machines, generators, compressors etc.

- Exoskeletal container frames built to specification

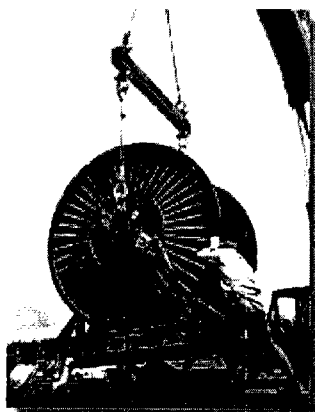

GAS BOTTLE OFFSHORE TRANSPORT CAGE

Gross mass: 1435 kg

Tare: 300 kg

Payload: 1135 kg

- Conforms with DNV 2.7-1 and APPEA guidelines for lifting equipment (2000)
- 4 point lift for safety
- 3.25 T Grade S safety shackles
- 13mm diameter sling legs
- will take 16 oxygen bottles or 9 acetylene
- complete with chain tensioners for securing load
- plated and certified

- Lifting equipment can be designed and manufactured to client specifications.

TOP DRIVE SWIVEL AND HOOK STORAGE RACK

Total working load 22 tonne (48,000LBS)
Load per lug 5.5 tonne (12,000LBS)

- Vertical storage of top drive hooks and swivels is strongly recommended by manufacturers as it protects against damage and distortion of internal lip seals.
